

RESOLUTION OF BOWEL OBSTRUCTION

ARE THERE CONCERNS ABOUT MICROCIRCULATION AND BOWEL VIABILITY?

1 FL OF **VERDYE 25 MG 5MG/ML** + 10 ML INJECTABLE STERILE WATER

IV BOLUS OF **2 ML** OF THE SOLUTION

PLEASE NOTE. Despite the repeatability of IV boluses, it is still recommended not to exceed the maximum dose recommended in the product leaflet

OBSERVATION OF THE COMPROMISED BOWEL SEGMENT FROM THE START OF THE INJECTION UNTIL TO THE FIRST FLUORESCENCE

PLEASE NOTE. Observation of either arterial supply or venous drainage. It is useful to compare the compromised bowel with the healthy one

EVENTUAL REPETITION OF THE BOLUS AND OBSERVATION AFTER GENEROUS IRRIGATION WITH WARM WATER IF NEEDED

DECISION RESECTION vs PRESERVATION

TAKE A PICTURE OR MAKE A BRIEF VIDEO

SEND IT TO THE **TELEGRAM** GROUP OR UPLOAD IT LATER ON THE **Google Form** naming the file with **center ID** followed by a dash and **patient ID**
